

Information Gathering

3. INDIVIDUAL INFORMATION TO MAJOR IN ORGANISATIONAL BEHAVIOR

- Information about a specific person which can be of any location.
- Multiple tools.

Information Gathering- Google

-  **Google is an Attacker's Ally**
-  Lot of information freely available via Internet on public platform
-  Personal information on company website or a social media site, that give hints to user account password.
-  Names can be entered in a search engine to reveal home addresses and telephone numbers.

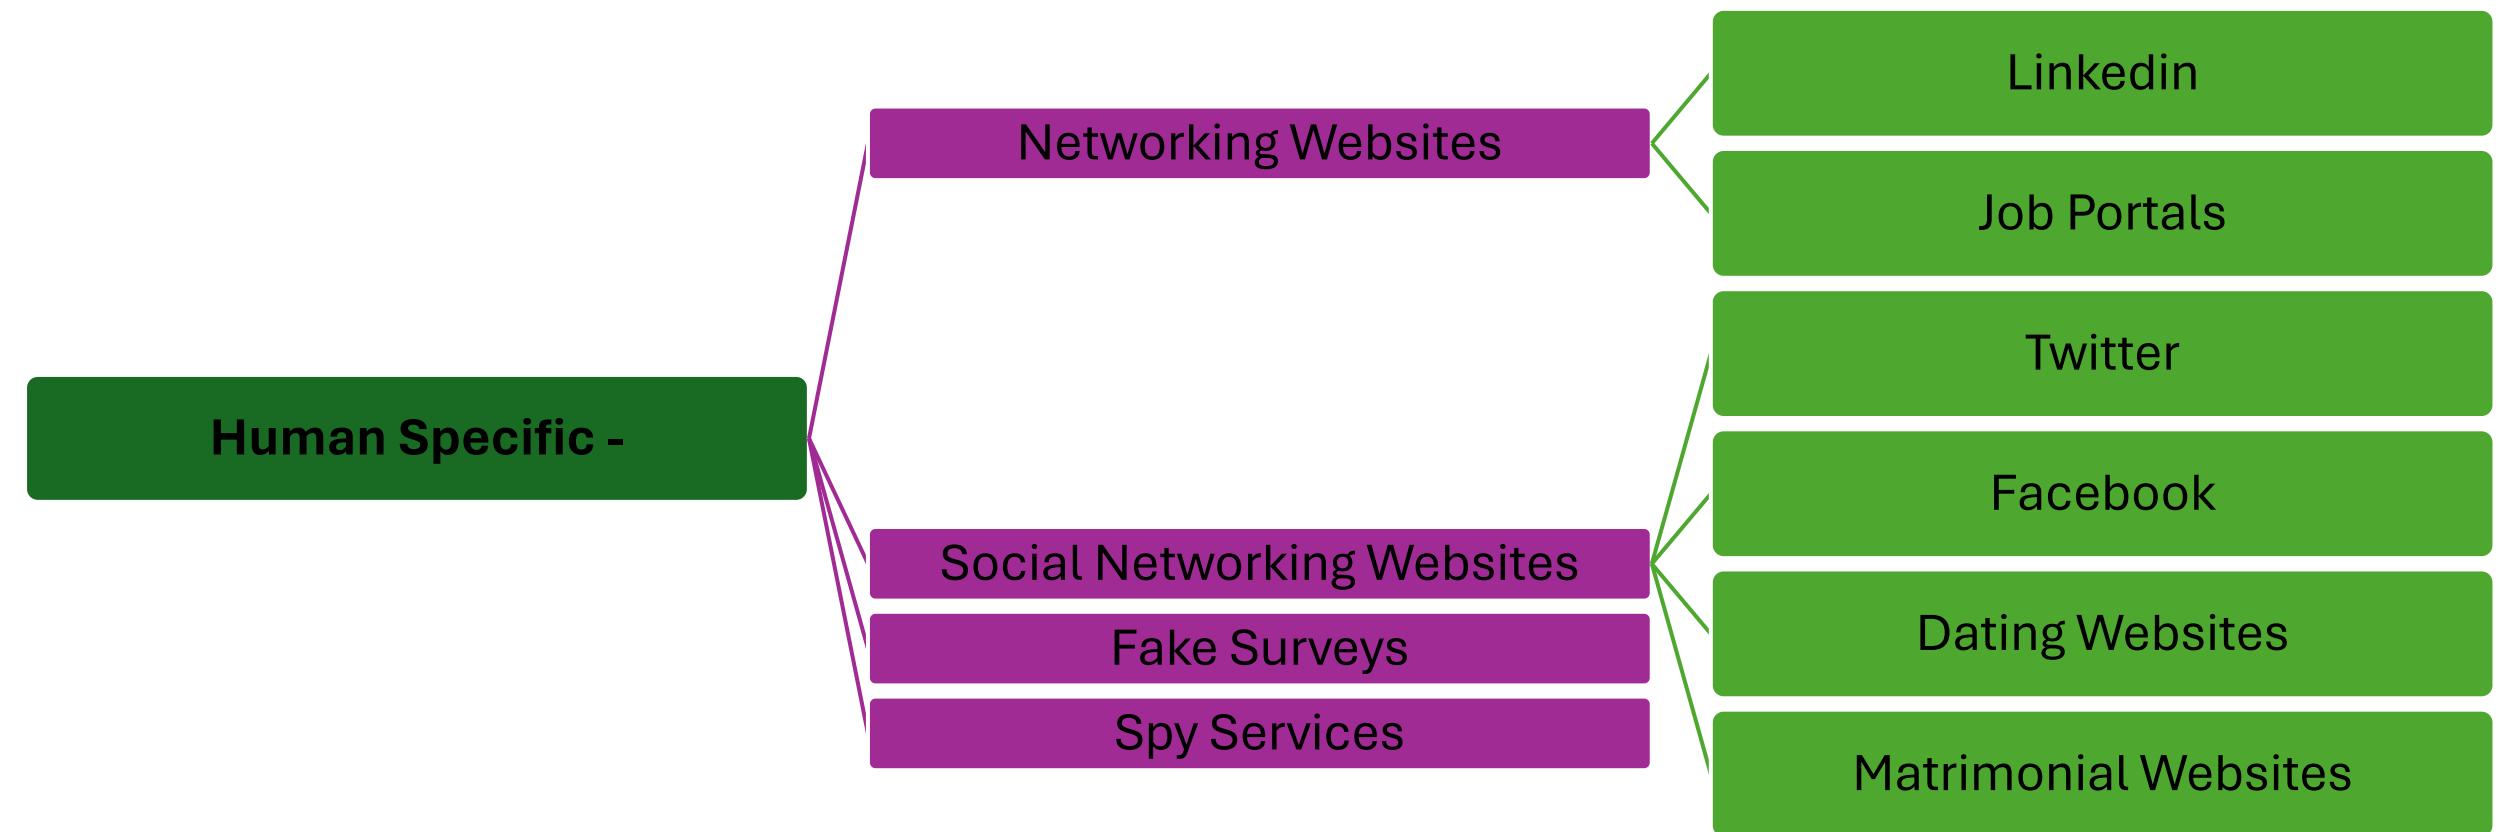

Google Hacking

Using *Google* as a Reconnaissance Tool

“Google is in many ways (the) most dangerous website on the Internet....”

-Scott Granneman, *SecurityFocus*

Information Gathering- Google

Other ways of Information Gathering

Social Networking Sites

Facebook , Instagram , twitter, Gmail+, linkedin etc.

Smart Applications

TRuecaller , Hackode etc.

Online Portals

Shaadi.com , Naukri.com, Shine.com, Indeed.com, jantakhoj.com, pipl etc.

Some fake emails

<https://temp-mail.org/> , <https://www.guerrillamail.com/inbox>

Some Tools

Maltego , HTTrack-Website Copier etc

[zabasearch .com](http://zabasearch.com)

names, addresses , phone numbers, date of birth,

[anywho.co m](http://anywho.com)

Phone book offering forward and reverse lookups

Google DORKS

<https://merabheja.com/tech-hacks/> (amazing hacks)

Google Dorks

Google Dork

- is a **search string** that uses advanced search operators to find information that is not readily available on a website.

Use Google Dorks

- To find vulnerabilities, **hidden information** and access pages on certain websites.

Google Dorks

Search keywords
in title, **URL** and
text

- **Blue or purple-Title of Web page**
- **Green-URL of web page**
- **Black-text of the web page**

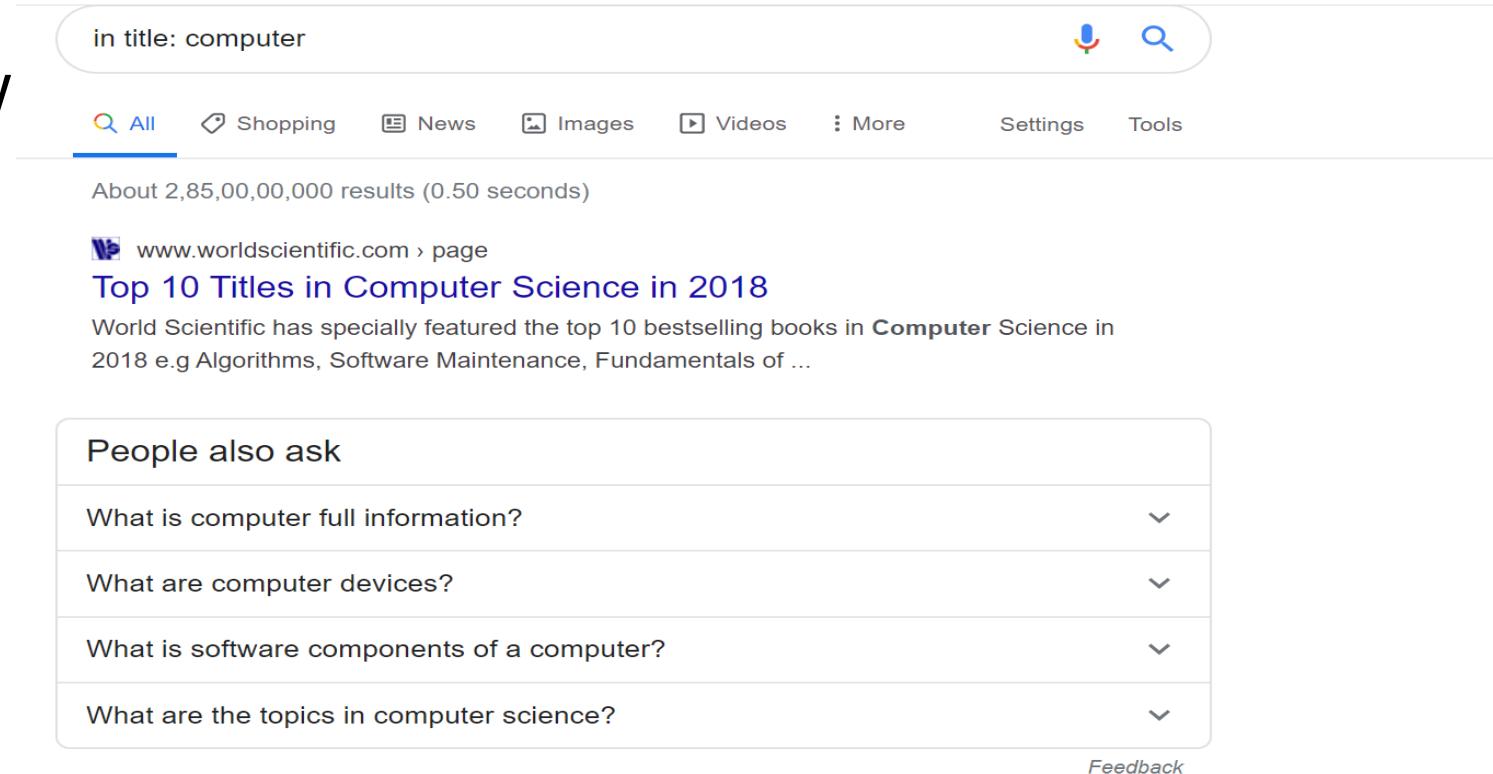

To search only in any one of them, is google dorks which optimizes the search

Optimized Search through google dorks

1. Search For keywords in Title (keyword should exist in title)

- Intitle: computer
- It will give all results in w

Is computer

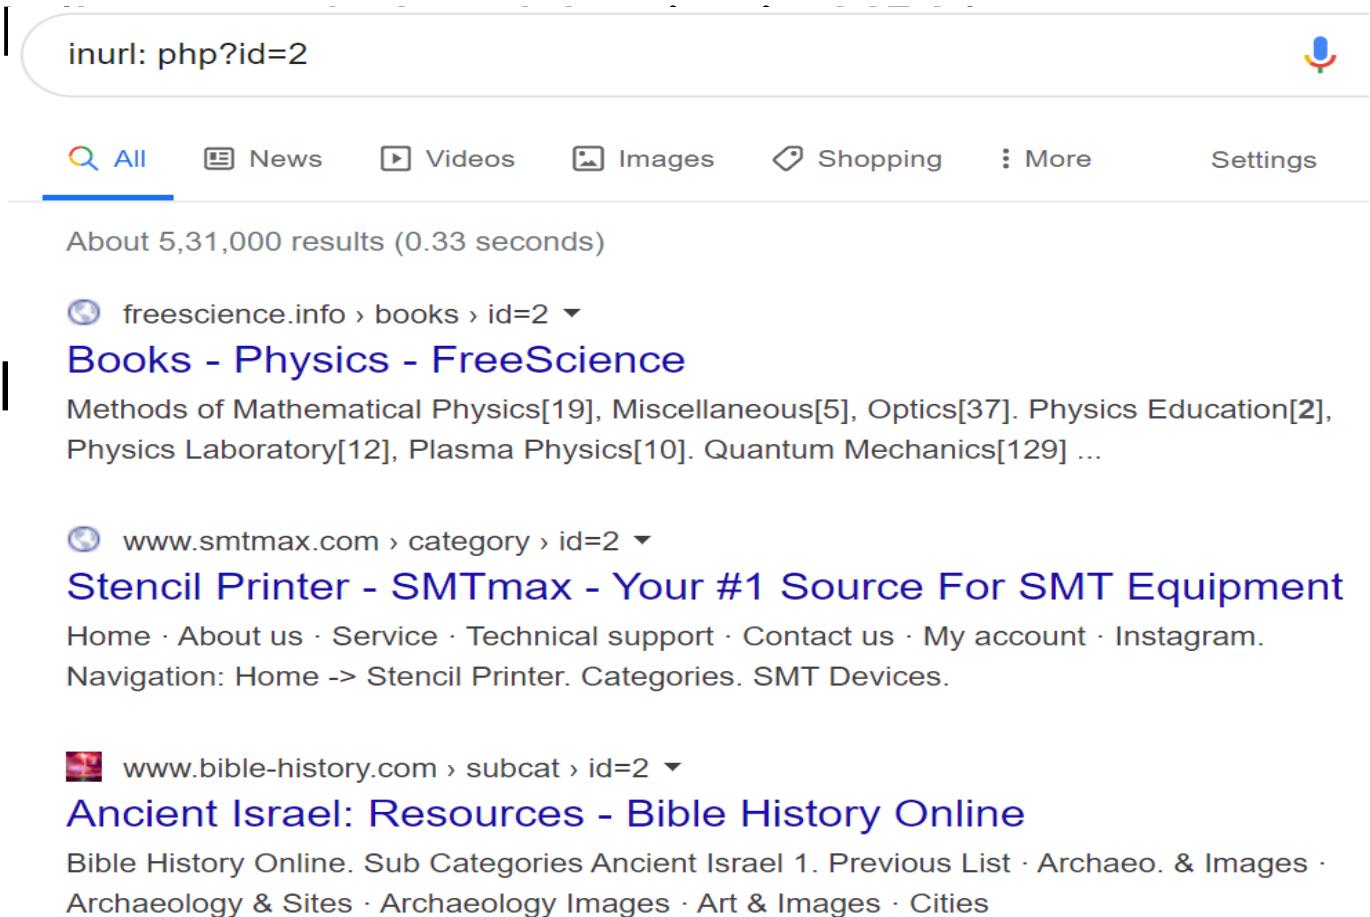

The screenshot shows a Google search results page with the query "in title: computer" entered into the search bar. Below the search bar, there are navigation links for "All", "Shopping", "News", "Images", "Videos", "More", "Settings", and "Tools". The search results indicate approximately 2,85,00,00,000 results found in 0.50 seconds. The top result is from www.worldscientific.com, titled "Top 10 Titles in Computer Science in 2018", which discusses the top 10 bestselling books in Computer Science for 2018. A "People also ask" sidebar is visible on the right, listing related questions such as "What is computer full information?", "What are computer devices?", "What is software components of a computer?", and "What are the topics in computer science?".

Optimized Search through google dorks

2. Search For keywords in URI

- Inurl : php?id=2
- Inurl : admin
- Inurl : admin.pk
- It will give all results in which has keyword

inurl: php?id=2

If http is blocked in an organization or on your system you can imbed https in front of link.

Why it works?

Because govt has blocked port 80, not 443.

What is the solution?

Govt should have blocked domain instead.

Leaked passwords

Passwords that were leaked or stolen from sites. I'm hosting them because it seems like nobody else I simply found them online, removed any names/email addresses/etc (I don't see any reason to support them).

The best use of these is to generate or test password lists.

Note: The dates are approximate.

Examples: filetype and inurl search

filetype xls inurl email.xls

A screenshot of a search results page. The search query is "filetype xls inurl email.xls". The results are filtered under the "All" tab, with options for Images, News, Videos, and More. The search took 0.44 seconds and found about 16,900 results. The first result is a link to a file named "doj-email.xls" from a CMU website, with a snippet of text describing it as containing email addresses from 2005.

Google crawl for password search

Here, some google search syntax to crawl the password:

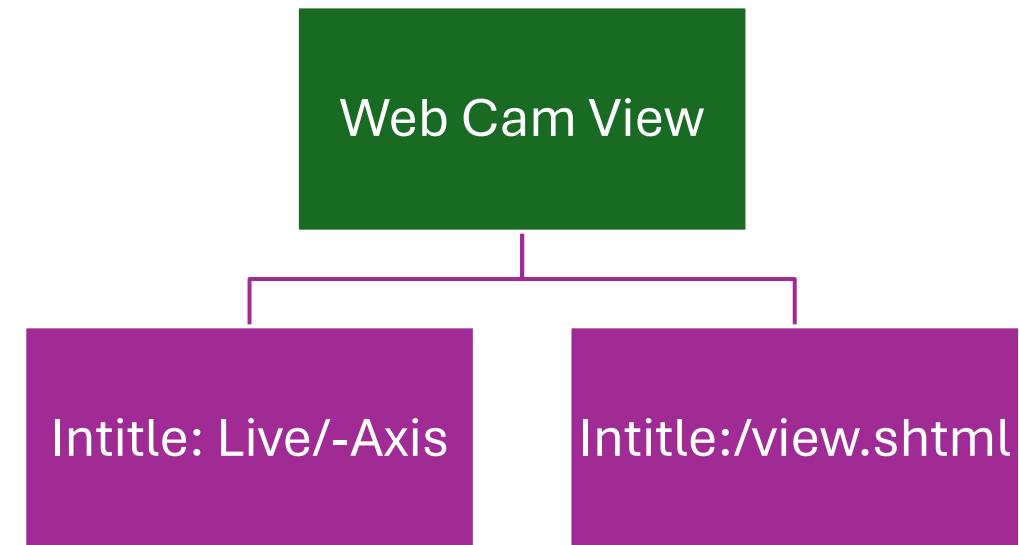

1. **"Login: *" "password =*" filetype: xls** (searching data command to the system files that are stored in Microsoft Excel)
2. **allinurl: auth_user_file.txt** (to find files auth_user_file.txt containing password on server).
3. **filetype: xls inurl: "password.xls"** (looking for username and password in ms excel format). This command can change with admin.xls)
4. **intitle: login password** (get link to the login page with the login words on the title and password words anywhere. If you want to the query index more pages, type allintitle)
5. **intitle: "Index of" master.passwd** (index the master password page)
6. **index of / backup** (will search the index backup file on server)
7. **intitle: index.of people.lst** (will find web pages that contain user list).
8. **intitle: index.of passwd.bak** (will search the index backup password files)
